Dot Coms Need You -- Despite some challenges, there's still a place for VARs

VAR Business , p 49

July 22, 2002

Document Type: Journal **ISSN:** 0894-5802 (United States)

Language: English **Record Type:** Fulltext

Word Count: 1411

TEXT:

By: Jeffrey Schwartz

Before the Internet bubble burst two years ago, all of Gino Mancinelli's

clients were dot coms. Last year, they represented 20 percent of his clientele. Today, the only dot com Mancinelli, a senior account representative at solution provider BCG, still counts as a client is Drugstore.com, an online-only pharmacy.

Like many surviving dot coms, Drugstore.com prefers to manage as much of its infrastructure as possible on its own. While it's having BCG upgrade its Oracle database from a four-processor to an eight-processor server

platform to support business expansion, Drugstore.com seldom uses solution providers and often buys refurbished network cards and other peripherals. Even when it does sign on an outside partner, such as Cable & Wireless' Exodus Internet, to host its data center and Web site, Drugstore.com uses its own staff and equipment at its facilities. ^

"All they provide us is floor space, bandwidth and power-ping, power and pipe," says Scott Green, Drugstore.com's senior director of technology.

While solution providers may not welcome such hit-and-run sentiment, it provides a candid, but important, assessment of where some of the largest virtual businesses are spending their technology dollars these days-and where they are most likely to bring in outside help. Those solution providers that understand how IT managers at dot coms implement and deploy technology-and their biases against third-party assistance-are the ones more likely to find opportunities to serve their needs.

The good news for consultants, systems integrators and VARs is many of those dot coms that have survived are not just in a holding pattern-they are building next-generation capabilities for their businesses-all with an emphasis on increasing revenue and maintaining profitability. While many dot coms overbuilt on the hardware side-adding more servers and routers than they needed before the economy went south-they still need hosting and bandwidth providers. Online companies are also looking to improve the capabilities and usability of their Web sites, allowing them to offer more products, faster response times to complex searches and overall better customer service and support. The bad news is, the freewheeling days of throwing solutions at every grand idea that pops into a 22-year-old CEO's head are over. "A year ago, time was a precious commodity," says Scott Sleeper, CTO of Tanning Technology, a Denver-based integration and IT architectural assessment firm. "If you could do it faster, that was worth something. Today, time is not the critical element. People are making much more rational decisions."

In addition, dot coms-tech-savvy themselves-are largely biased against using outside help. "I don't think (VARs) understand the businesses they're dealing with before they come in the door," Drugstore.com's Green says. "I'll bet you I get 40 to 50 calls a week from VARs that have never even seen my site."

And those VARs that can pass the basics have to overcome a bigger hurdle-many dot coms simply like to purchase big-ticket items directly. They have large development and integration capabilities in-house, which they say are more cost-effective than paying an outside integrator. "I would say with the small (integrators), you're paying 100 percent premium over what you would pay if you had them on your own staff," says Etienne Handman, CTO at E-Loan, an online provider of consumer financing. "With the Accentures of the world, it's closer to three times-that's a pretty big premium."

Going Once...

Even eBay, arguably the most successful dot com, avoids using outside help.

But Chuck Geiger, eBay's vice president of product development and architecture of the online auction site, concedes integrators can, at times, fill a strategic niche.

Given its meteoric growth in recent years-the company expects to break the \$1 billion mark this year, a figure it hopes to see triple by 2005-eBay has stretched the outer limits of its infrastructure. Its subscriber base, just 12 million in 2000, is now 46 million. In a nutshell, eBay's systems were not designed for the amount of traffic and transaction volume it now has and aspires to grow to.

As a result, it is in the midst of rearchitecting its Web site and back-office operations with a platform it calls V3. The first phase involved partitioning its databases so each auction would have its own cluster rather than running all the auction categories on a common database. By doing so, outages that once routinely made headlines have ceased for the most part.

Now, eBay is working directly with IBM on rearchitecting its application code from standard C++ to Java 2 Enterprise Edition in an effort to improve developer productivity by building reusable components. More than 100 internal eBay developers are rewriting 3 million lines of code. The effort is so ambitious that eBay only agreed to do it if the programmers who designed and built IBM's WebSphere suite were on hand to help out.

"I knew I was going to break it because of my capacity and my unique need, and that's proven correct, actually, so having the biggest and best from IBM and having direct access made it impossible for me to use a middleman,"

Geiger says.

But eBay did use middlemen to validate its plans for V3; Accenture and Tanning were brought in to assess the new architecture and its methodology.

"Tanning helped discern the type of architecture to build, and then Accenture helped me put together the program to build it," Geiger says.

Assessing the architecture was a significant engagement for Tanning,

Sleeper notes. For one, there isn't another dot com with comparable transaction volume. "EBay conceived a new business model, but pushed the

technology beyond where it was ever designed to go," Sleeper says.

"They're

the 800-pound gorilla."

In addition, eBay plans to launch a B2B site that will let retailers unload excess inventory. EBay brought in Accenture to build a listing engine, which eBay will own and Accenture will license back to develop links for retail clients. In return, Accenture will receive per-transaction fees from retailers for their use of the listing engine, says Accenture partner

Kevin Reedy. Although such revenue-sharing schemes are less common than they were during the boom, Reedy says Accenture is doing more of them these days on a strategic basis.

Maintaining Internal Control

Other dot coms face the same in-house and outsource issues, albeit on a smaller scale, acknowledging there are places VARs and integrators can provide value.

For example, E-Loan's Handman has not ruled out bringing in outside help for the upgrade of its mortgage loan-origination system-Eastern Software's Empower-to a pure Web-based, three-tier application platform. The upgrade will let different applications communicate with each other rather than through a shared database, giving customers real-time views of the loan-processing procedure. Handman is also considering replacing E-Loan's homegrown document-management system with a turnkey document- and image-management solution, and is open to bringing in outside help. "My core business is making loans, not making image-management systems," Handman says.

Like E-Loan, online broker Ameritrade is considering bringing in a solution provider to build out a new call center and to implement an event-driven job-automation system from Tidal Software, Mountain View, Calif. Coming off its acquisition of rival Datek Online Financial Services,

speed and lack of resources may warrant bringing in an outside partner, says Gary Greenwald, vice president of enterprise development.

Travelocity.com also has its own strategic effort under way, where it is maintaining internal control over development but using EDS for administration. As part of its plan to roll out a revamped Web site set for later this year, the online travel-reservation **service** is deploying Oracle 9i Real Application Cluster. The system will replace some mainframe applications and a recently deployed standard Oracle 9i database with a platform that will help "improve the shopping experience we offer," says Richard Pendergast, vice president of systems at Travelocity.

EDS also runs Travelocity's data **center** and hosts its Web site. And while Travelocity negotiates its deals directly with its key vendors, which include Oracle and Sun, it uses EDS' volume-purchasing clout to negotiate the best price. "The reason we involve EDS is we can get an even better deal," Pendergast says.

Travelocity works with other solution providers, as well. For example, when Travelocity acquired Site59.com, a company that sells excess inventory of air, hotel and car-rental services in March, it turned to NCR and InterVoice-Brite to link its telephone systems and customer databases and to roll out new call **centers**. It also used NCR's consulting services to deploy that company's Teradata CRM tools.

"While CRM is a skill Travelocity considers part of its core competency, we recognized NCR had additional skills, so working together we were able to jumpstart our CRM efforts," Pendergast says. "We're always looking for in-source vs. outsource opportunities."

**eBay and Accenture Unveil New Service for Large Volume Sellers; "Connection to
eBay" Links 46 Million Consumers to Inventories of Manufacturers and Retailers**

Text:

eBay and **Accenture** today introduced a new service designed to help retailers, manufacturers and distributors more efficiently and cost-effectively sell merchandise on eBay. The new service, called...

...the NetWorld+Interop conference in Las Vegas during a keynote speech by Maynard Webb, president of eBay Technologies, and Robert Frerichs, a managing partner in **Accenture's** Communications & High Tech group.

The initiative will combine eBay's marketplace of nearly 46 million registered users with **Accenture's** proven track record of delivering innovative technology and management services and solutions to businesses. The two executives said the goal of "Connection to eBay...

...more profitable and easy-to-use vehicle to sell excess or discontinued inventory on eBay. The new service, which will be owned and operated by **Accenture**, allows sellers to tap into a wide range of enhanced tools and services including sales strategies, high-volume **listing** capabilities, customer **service** and support, checkout, payment and fulfillment processes. ...by offering buyers a greater choice of merchandise while presenting new distribution options for businesses looking to sell excess inventory."

According to research conducted by **Accenture**, U.S. businesses process nearly \$80 billion in excess or "end-of-life" inventory. But selling this inventory is inefficient, often involving multiple distribution points...

...and services that help companies tightly integrate their business within the eBay platform allowing them to more quickly reach eBay's extensive online commerce community." **Accenture** and eBay conducted extensive market research and field trials and found that merchants often earn up to twice as much, and sometimes more, on each...

...Connection to eBay" testing this summer with a select number of clients. A full roll-out of the services are planned before year's end.

Kevin Reedy, a partner in **Accenture's** Communications & High Tech group will head the "Connection to eBay" service, which will be adjacent to eBay's offices in San Jose, Calif.

About...

...of categories for sale on eBay. eBay enables trade on a local, national and international basis with customized sites in markets around the world.

About **Accenture**

Accenture is the world's leading management consulting and technology services organization. Through its network of businesses approach -- in which the company enhances its consulting and outsourcing expertise through alliances, affiliated companies and other capabilities -- **Accenture** delivers innovations that help clients across all industries quickly realize their visions. With more than 75,000 people in 47 countries, the company generated net revenues of \$11.44 billion for the fiscal year ended August 31, 2001. Its home page is www.accenture.com.

LAS VEGAS, May 7, 2002 (BUSINESS WIRE)
- eBay and **Accenture** today introduced a new service designed to help retailers, manufacturers and distributors more efficiently and cost-effectively sell merchandise on eBay. The new service, called "Connection to eBay," was introduced this afternoon at the NetWorld+Interop conference in Las Vegas during a keynote speech by Maynard Webb, president of eBay Technologies, and Robert Frerichs, a managing partner in **Accenture's** Communications & High Tech group.

The initiative will combine eBay's marketplace of nearly 46 million registered users with **Accenture's** proven track record of delivering innovative technology and management services and solutions to businesses. The two executives said the goal of "Connection to eBay" is to provide businesses with a more profitable and easy-to-use vehicle to sell excess or discontinued inventory on eBay. The new service, which will be owned and operated by **Accenture**, allows sellers to tap into a wide range of enhanced tools and services including sales strategies, high-volume **listing** capabilities, customer

service and support, checkout, payment and fulfillment processes. During the keynote address, Webb called "Connection to eBay" a natural evolution of the eBay marketplace. "Businesses are looking for innovative, effective and value-driven solutions as they explore new markets via the Internet," Webb said. "'Connection to eBay' will expand the eBay trading platform by offering buyers a greater choice of merchandise while presenting new distribution options for businesses looking to sell excess inventory."

According to research conducted by **Accenture**, U.S. businesses process nearly \$80 billion in excess or "end-of-life" inventory. But selling this inventory is inefficient, often involving multiple distribution points, intermediaries and numerous physical and transactional steps. "'Connection to eBay' creates a new alternative to cumbersome and costly liquidation channels for companies to achieve a greater return by selling inventory through eBay's efficient marketplace," said Frerichs. "Our turnkey solutions are based upon scalable tools and services that help companies tightly integrate their business within the eBay platform allowing them to more quickly reach eBay's extensive online commerce community."

Accenture and eBay conducted extensive market research and field trials and found that merchants often earn up to twice as much, and sometimes more, on each transaction, by selling on eBay as compared to traditional liquidation channels. The two companies have been testing "Connection to eBay" on a limited basis by selling "end-of-life" computer equipment on the eBay site and will expand "Connection to eBay" testing this summer with a select number of clients. A full roll-out of the services are planned before year's end.

Kevin Reedy, a partner in **Accenture's** Communications & High Tech group will head the "Connection to eBay" service, which will be adjacent to eBay's offices in San Jose, Calif.

About eBay

eBay is The World's Online Marketplace(TM). Founded in 1995, eBay created a powerful platform for the sale of goods and services by a passionate

community
of individuals and businesses. On any given day, there are millions of
items
across thousands of categories for sale on eBay. eBay enables trade on
a
local, national and international basis with customized sites in
markets
around the world.

About **Accenture**

Accenture is the world's leading management consulting and
technology services
organization. Through its network of businesses approach -- in which
the
company enhances its consulting and outsourcing expertise through
alliances,
affiliated companies and other capabilities -- **Accenture** delivers
innovations
that help clients across all industries quickly realize their visions.
With
more than 75,000 people in 47 countries, the company generated net
revenues
of
\$11.44 billion for the fiscal year ended August 31, 2001. Its home page
is
www.accenture.com.

Some 46 million consumers who are members of the Internet auction service eBay will soon have access to a wide variety of merchandise sitting in retailers' and manufacturers' inventories as a result of a new service launched with **Accenture** Communications.

The new service, dubbed "Connection to eBay", was announced during a keynote speech by Maynard Webb, president of eBay Technologies, and Robert

Frerichs, a managing partner in **Accenture's** Communications & High Tech group last Tuesday at the NetWorld+Interop conference in Las Vegas. The new service aims to give retailers, manufacturers and distributors a more profitable and easy-to-use vehicle to sell excess or discontinued inventory on eBay.

Evolution of an E-commerce Site

eBay's Webb characterized the initiative as a natural evolution of the eBay marketplace. "Businesses are looking for innovative, effective and valuedriven solutions as they explore new markets via the Internet," he

said. "'Connection to eBay' will expand the eBay trading platform by offering buyers a greater choice of merchandise while presenting new distribution options for businesses looking to sell excess inventory."

"Connection to eBay", which will be owned and operated by **Accenture**, allows sellers to tap into a wide range of enhanced tools and services including sales strategies, high-volume **listing** capabilities, customer **service** and support, checkout, payment and fulfillment processes.

"If you look back at eBay over the last five or six years, there have been several stages in our development where a new product or a new service has been introduced into the marketplace," explained Kevin Pursglove, senior director, communications, eBay Inc. "Now with our work

with **Accenture**, we think that evolution can take yet a new step. By working with **Accenture**, offering eBay users a much broader list of merchandise of name-brand retailers, distributors and manufacturers."

Accenture and eBay conducted extensive market research and

field trials and found that merchants often earn up to twice as much, and sometimes more, on each transaction, by selling on eBay as compared to traditional liquidation channels. The two companies have been testing "Connection to eBay" on a limited basis by selling "end-of-life" computer equipment on the eBay site and will expand "Connection to eBay" testing this summer with a select number of clients. A full rollout of the services are planned before year's end.

Market research, Pilot Testing

Kevin Reedy, a partner in **Accenture's**

Communications & High Tech group will head the "Connection to eBay" service, which will be adjacent to eBay's offices in San Jose, Calif.

"We've been in a pilot where we've been building out our business model,

we've been trying it on a pilot basis actually selling some end-of-life PCs

- desktops and laptops," Reedy told us. "We've actually gotten excellent

returns on those. We had some PCs that had a liquidation value of \$36 and

we sold them on eBay for a range of \$80-130. We had some laptops; we had a

quote from the liquidator for \$200 and we sold them on eBay for an average

of about \$400. We're getting excellent returns now, even on a trial basis

which validates a lot of the market research we've done over the last nine-to-12 months."

Pursglove pointed out that the new offering is a natural evolution

for the eBay service. "eBay keeps a very close eye on what we call our miscellaneous category," he said. "We refer to it as our R&D Lab.

It's where eBay users actually begin to test the market and we can actually

see eBay users developing the potential for a new marketplace. We've seen

that where our users have actually used the miscellaneous category to begin

selling automobiles, real estate and certainly computers. ... We intend to

keep an eye on our users, determine how our users are actually using the

eBay marketplace and when appropriate we will dedicate the necessary resources to help build a portion of the marketplace."

The project is now preparing to move into its beta test phase.

The companies will bring on two larger clients to sell more inventory beginning

in July. The service plans to add about two clients a month over the summer. "Sometime in Q4 we expect to be fully operational," Reedy said.

"Right now, we're making sure that we have a quality experience for both

our buyers and sellers and make sure that we respect the quality needs of

the eBay community." (Kevin Pursglove, eBay, 408/376-7458; **Kevin**

Reedy, Accenture, 917/452-5519.)

eBay and Accenture Unveil New Service for Large Volume Sellers; "Connection to eBay" Links 46 Million Consumers to Inventories of Manufacturers and Retailers

Text:

...today introduced
a new service designed to help retailers, manufacturers and
distributors
more
efficiently and cost-effectively sell merchandise on eBay. The new
service,
called "**Connection to eBay**," was introduced this afternoon at
the
NetWorld+Interop conference in Las Vegas during a keynote speech by
Maynard
Webb, president of eBay Technologies, and Robert...

...users with Accenture's proven track record of delivering innovative
technology
and management services and solutions to businesses. The two executives
said
the goal of "**Connection to eBay**" is to provide businesses
with a more
profitable and easy-to-use vehicle to sell excess or discontinued
inventory
on
eBay. The new service, which will be owned and operated by Accenture,
allows
sellers to tap into a wide range of enhanced tools and services
including
sales strategies, high-volume **listing** capabilities, customer service
and
support, checkout, payment and **fulfillment** processes.
During the keynote address, Webb called "**Connection to eBay**"
a natural
evolution of the eBay marketplace. "Businesses are looking for
innovative,
effective and value-driven solutions as they explore new markets via
the
Internet," Webb said. "'**Connection to eBay**' will expand the
eBay trading
platform by offering buyers a greater choice of merchandise while
presenting
new distribution options for businesses looking to sell excess...

...in excess or "end-of-life" inventory. But selling this inventory is inefficient, often involving multiple distribution points, intermediaries and numerous physical and transactional steps.

"'Connection to eBay' creates a new alternative to cumbersome and costly liquidation channels for companies to achieve a greater return by selling inventory through eBay's efficient marketplace...

...twice as much, and sometimes more, on each transaction, by selling on eBay as compared to traditional liquidation channels. The two companies have been testing "Connection to eBay" on a limited basis by selling "end-of-life" computer equipment on the eBay site and will expand "Connection to eBay" testing this summer with a select number of clients. A full roll-out of the services are planned before year's end.

Kevin Reedy, a partner in Accenture's Communications & High Tech group will head the "Connection to eBay" service, which will be adjacent to eBay's offices in San Jose, Calif.

Accenture's Connection to eBay(TM) and Yantra Provide Order

Text:

Brylane L.P., a catalog and Internet retailer of apparel and home products, has chosen the Accenture (NYSE: ACN) **Connection** to **eBay**(TM) service and Yantra 5x software applications to provide order management and **fulfillment** services, enabling Brylane to quickly and easily list, track and sell excess or overstocked inventory on eBay.

Accenture's **Connection** to **eBay** service, which provides mid- and large-sized retailers, manufacturers and distributors with a cost-effective channel for selling large volumes of inventory, uses Yantra's software to track and manage the order **fulfillment** process involving buyers, retailers, manufacturers and distributors.

For Brylane, **Connection** to **eBay** will use Yantra Distributed Order Management and Yantra Inventory Synchronization, both applications in the Yantra 5x product suite. Brylane anticipates that it will be able to realize substantially higher margins on merchandise sold through the **Connection** to **eBay** service than it might through using conventional liquidation methods.

"Selling large volumes of overstock or liquidated inventory necessitates that we have a robust order **fulfillment** solution," said Kevin Reedy, the Accenture partner who leads **Connection** to **eBay**. "Yantra's software solutions enable us to provide our clients with the flexibility of different service options that best suit their needs while ensuring the same high level of service commensurate with our overall offering."

"Being selected by Accenture's **Connection** to **eBay** to provide order management and **fulfillment** is a testament to the strength of our solutions," said Devdutt Yellurkar, president and CEO of Yantra. "We're also pleased to add Brylane to...

...that have adopted our software as their solution for fulfilling customer orders on time, as promised and in a highly cost-effective way."

Accenture's **Connection** to **eBay**, launched in May 2002, is an end-to-end

service that offers companies selling inventory on eBay everything from simple listings to inventory management, warehousing and logistics. By increasing efficiencies in the **listing** and sales process, **Connection to eBay** can help sellers make more on each transaction than through traditional liquidation channels.

About Accenture

Accenture is the world's leading management consulting and technology
...

...Yantra

Yantra is the leading provider of supply chain solutions for the extended enterprise. Our solutions enable companies to dramatically improve the execution of order **fulfillment**, supply collaboration and service parts logistics across the extended enterprise.

...home-grown technology that will allow large retailers, manufacturers and distributors to efficiently unload excess inventory through eBay.

Accenture owns and operates the new service, "**Connection to eBay**" which gives sellers access to high-volume **listing**

capabilities, customer support, checkout, payment and **fulfillment** processes. Maynard Webb, president of eBay Technologies, and Robert Frerichs, managing partner in Accenture's Communications & High Tech group, introduced "**Connection to eBay**" at the NetWorld+Interlop conference in Las Vegas May 7.

...multiple SKUs were involved, said Hodgett. The marketplace required sellers to perform tasks, which, in aggregate, were particularly time-consuming for large players, such as **listing** product information, choosing the appropriate auction, managing the auction daily and constantly communicating with potential buyers through e-mail.

In an exclusive arrangement with eBay...

Yantra Day 2003 -- Strategies for Achieving Fulfillment Excellence; Annual Event Showcases Solutions for Fulfillment Excellence; Best Buy, Connection to eBay and DHL to Present Along with Harvard Professor Clayton Christensen and Yantra President and CEO.

Text:

BOSTON -- BOSTON, April 30 /PRNewswire/ -- Yantra Corporation (<http://www.yantra.com/>), the leading provider of solutions for **Fulfillment Excellence**, hosts its annual Yantra Day event today at the Ritz-Carlton Boston. The theme of Yantra Day 2003 is Strategies for Achieving **Fulfillment Excellence**. Yantra Day is an opportunity for customers, prospects, industry and financial analysts, and press to share their real-world experiences and discuss best practices for achieving **Fulfillment Excellence**.

(Photo: <http://www.newscom.com/cgi-bin/prnh/20000705/YANTLOGO>)

"Achieving **Fulfillment Excellence** is imperative for operating businesses profitably in tough economic times," said Devdutt Yellurkar, Yantra's president and CEO. "Yantra Day 2003 is a forum... presenters and attendees to discuss real-world examples and obtain actionable direction for transforming not only their supply chains, but also their businesses to achieve **Fulfillment Excellence**."

This year Yantra welcomes Best Buy, DHL and **Connection to eBay** as featured customer presenters. The program also features Harvard professor, Clayton Christensen, author of "The Innovator's Dilemma"

who is delivering the lunch keynote. Yantra president and CEO, Devdutt Yellurkar, will also address the audience on the topic of Achieving **Fulfillment Excellence**.

In addition to the customer and keynote presentations, there will be an interactive panel discussion on the most pressing topics facing companies striving to achieve **Fulfillment Excellence** today. Joining Yantra on the panel will be Accenture, AMR Research, BEA Systems, CSC Consulting and Gartner.

At the event, Yantra will be introducing its new Synchronized **Fulfillment Management Solutions** (see separate press release titled "Yantra Closes Successful Year and Introduces Synchronized **Fulfillment Management Solutions**," also issued today). Yantra Synchronized **Fulfillment Management Solutions** help ...transform their supply chain, develop operational flexibility and achieve new levels of performance.

Hewlett Packard launched the HP Store on eBay for selling PCs, notebooks, printers, handhelds, and low-end servers.

HP built the store using Accenture's **Connection** to eBay service. The Accenture service is designed to help large and medium-sized businesses sell their products on eBay.

Initially the HP Store will sell refurbished hardware, primarily canceled orders, and returned products that have never been removed from their original packaging.

The Accenture **Connection** to eBay service helps companies decide on product assortment, **listing**, and pricing strategies. The service provides FAQ and storefront policy pages, and manages customer queries via e-mail.

Patent Applicant/Patent Assignee:

- **NORTH CAROLINA STATE UNIVERSITY**
Campus Box 7003, 1 Holladay Hall, Raleigh, NC 27695-7003; US;
US(Residence); US(Nationality); (For all designated states except: US)
- **AGDIA INCORPORATED**
30380 County Road 6, Elkhart, IN 46514; US; US(Residence); US(Nationality);
(For all designated states except: US)

Patent Applicant/Inventor:

- **ROE R Michael**
104 Bromfield Way, Apex, NC 27502; US; US(Residence); US(Nationality);
(Designated only for: US)
- **BAILEY Woodward D**
3443 Balfour Way, Durham, NC 27713-1447; US; US(Residence);
US(Nationality); (Designated only for: US)
- **GOULD Fred**
216 Furches Street, Raleigh, NC 27607-4056; US; US(Residence);
US(Nationality); (Designated only for: US)
- **KENNEDY George G**
Route 2, Box 120, Apex, NC 27502; US; US(Residence); US(Nationality);
(Designated only for: US)
- **SUTULA Chester L**
53201 Old Farm Road, Elkhart, IN 46514; US; US(Residence); US(Nationality);
(Designated only for: US)

Legal Representative:

- **MYERS BIGEL SIBLEY & SAJOVEC P A(agent)**
P.O. Box 37428, Raleigh, NC 27627; US;
